Program:

Jerry Besanceney introduced himself and began by thanking all Rotarians who have served in the military, including **Orville Varasso**, who just turned 97 and who served as an Intelligence Officer in World War II.

Jerry then showed a video describing what the National Geospatial-Intelligence Agency is and what they do. He also described AFIO (Association of Former Intelligence Officers). According to them, two major upcoming factors are Artificial Intelligence and Quantum Computing. Quantum Computing has been described as something as impactful to humans as the invention of fire. We want to be in front of and be able to detect any missile launchings, such as from North Korea, and these two technologies can help us get there.

He showed a couple other videos and shared great information regarding our strategies and intelligence to protect the US from outside attacks. The knowledge and technology that goes into this defense is overwhelming and quite scary.
