Three Minute Speech: Shannon Walker

Rotary Youth Exchange: Eduardo Zanella, from Brazil, gave a humorous, yet heart filled thank you speech to all Rotarians and families who took him in and made Newark, Ohio a 2nd home for him. He began with the statement, "Ohio weather is not good!" It was over 100 degrees when he left Brazil.

Sergeant-at-Arms: Skipped due to time.

Program: Jerry Besanceney began by showing a graph of "The World as 100 People" over the last two centuries, which illustrated the major advancements we've seen over time, and how things are moving quicker and quicker:

Jerry continued by sharing information about the Millennial generation and what changes they are expected to bring over the next 10-20 years.

He then went into the development and major advancements that are occurring with robotics and AI (Artificial Intelligence). He explained how these robots are self-learning and continuing to gain new knowledge every day. AI is already integrated into our daily living. For example, the news you may see on the internet, or even Facebook, is becoming tailored to us based off other similar topics you've clicked on before. It's usually going to agree with you and correspond to your thoughts and opinions. The possible result to this, however, is that we may have a less balanced point of view.

Other major advancements include Elon Musk, owner of Tesla, launching Neuralink. This company focuses on how you could attach AI to a human brain and make things work through thought, without even speaking it. The thought of this even being a possibility led Jerry to his concluding statement that this could be the last human generation to exist, because as we begin to integrate AI into human life and even brain, we may begin to expect this blend in future generations.

Thought of the week: "Ability is what you're capable of doing. Motivation determines what you do. Attitude determines how well you do it." – Lou Holtz
